PRE-PERSONALIZED WHITE CARD PRODUCTS

Value Added Services

LINXENS PRE-PERSONALIZED WHITE CARD PRODUCTS are semi-finished card products based on our well-established white card production process, in combination with chip encoding and data printing.

They enable customers to simply purchase pre-personalized cards without investing in expensive encoding and printing equipment, or having to manage a complex production and quality assurance process.

LINXENS PRE-PERSONALIZED WHITE CARDS are available as PVC CARD, COMPOSITE CARD and as robust CLAMSHELL CARD version in both low and high frequencies. Due to its flexible encoding set-up, LINXENS offers industry-standard formats as well as customized formats. Optical and electronic in-house tests ensure a high level of printing and encoding quality. In addition customized packaging is available upon request.

The pre-personalized White Card Products complies with industry quality standards including ISO/IEC 7810 and ISO/IEC 10373-1.
