

Linxens and Wirepas join forces to drive IoT innovation

Levallois-Perret (France) and Tampere (Finland), 17 September 2024. Linxens, a global leader in innovative component-based solutions provider for smartcards, Government, IoT and Healthcare, and Wirepas, a pioneer in decentralized wireless mesh networks, are pleased to announce a partnership aimed at transforming the future of IoT, particularly in the logistics, mobility, and transportation sectors.

By combining Linxens' advanced IoT and traceability solutions with Wirepas' scalable, decentralized mesh technology, the partnership will provide **unprecedented capabilities for managing vast networks of connected devices without requiring heavy infrastructure**. From logistics and supply chain management to smart mobility, the joint new IoT solutions will soon enable real-time tracking, improved efficiency, and seamless communication.

Linxens will bring its deep expertise in **developing both software and hardware for the IoT**, offering advanced solutions in traceability, authentication and monitoring. With a proven track record of delivering powerful, innovative technologies, Linxens will ensure the seamless integration of IoT devices across multiple industries, optimizing connectivity and traceability.

Wirepas, on the other hand, will provide its **reliable and energy-efficient mesh network technology**, enabling large-scale IoT deployments without the need for extensive infrastructure. Thanks to its decentralized approach, Wirepas will offer flexibility and scalability, ensuring robust, low-power solutions that can adapt to the evolving needs of industries such as logistics, mobility, and transportation. Together, they will revolutionize IoT deployments, enabling greater flexibility and scalability in industries that require high-performance, low-power solutions.

"With Wirepas' expertise in decentralized mesh networking and Linxens' leadership in IoT traceability, we are opening new possibilities for connected mobility and logistics," said Q† enfin PRETET. VP of Linxens IoT Solutions. "We can yet announce that our collaboration will initially drive innovation in the logistics sector, offering technological solutions that are expected by the market from years."

"We are proud to partner with Linxens, a global player in the electronics industry and in secure interconnection solutions. Thanks to their expertise and our wireless connectivity technology, this partnership opens up new opportunities for reliable, scalable and fully secure IoT solutions," said Eden, Sales and Business Director, SEMEA of Wirepas.

END

About Linxens

Linxens is a key player in innovative solutions across various industrial sectors and aims to provide tailored solutions to its commercial partners to help them improve their operations and deliver seamless experiences to end-users. Linxens is the preferred supplier for numerous global pioneers in technology shaping markets in telecommunications, transportation, hospitality, leisure and entertainment, financial services, e-Government, access control, healthcare, and the Internet of Things (IoT).

About Wirepas

Wirepas is a leading IoT company with a mission to democratize enterprise IoT. It aims to make failure-free connectivity accessible to any enterprise of any size. It makes IoT real through its connectivity software enabling massive decentralized, scalable, high-density, and long-range network applications. Its technology lets any enterprise set up and manage its own network autonomously without operators, separate network infrastructure, middlemen or subscriptions - at a fraction of the cost of other alternatives. Wirepas is also the main contributor to the first non-cellular 5G standard, purpose-built for massive IoT and using a free global spectrum. It serves customers across the world with offices in Australia, Germany, Finland, France, India and the United States, in the areas of smart tracking, smart building, smart manufacturing and smart metering.
